## FastTrack5 qualifying criteria checklist 6

## Clearing native vegetation to manage thickened vegetation (operational work)

This form must be used when seeking a FastTrack5 assessment pathway for the following trigger:

1. schedule 10, part 3, division 3, table 1 (operational work for managing thickened vegetation as defined under the *Vegetation Management Act 1999*).

When submitting an application containing a FastTrack5 trigger to SARA using MyDAS2, applicants must upload a completed qualifying criteria checklist for each eligible trigger. The responses on the form must demonstrate that the triggered aspect of development meets all qualifying criteria applicable to the relevant eligible trigger.

Where an application has more than one SARA trigger, but not all triggers or aspects of development are eligible for FastTrack5 assessment, the application will be subject to the standard statutory assessment timeframes. However, any aspects of development eligible for FastTrack5 assessment will benefit from the reduced FastTrack5 application fee.

Applicants should also provide or make reference to any supporting information or material that supports their claim for a FastTrack5 assessment.

When seeking FastTrack5 assessment for eligible triggers, you must:

- 1. have completed any other forms relevant to your application
- 2. upload a completed copy of this form when making your application using MyDAS2
- 3. provide all supporting information required on the form at the time of lodgement this information will assist SARA in undertaking its FastTrack5 assessment.

Where not defined, all terms used in this form have the meaning given in the State Development Assessment Provisions (SDAP) State Code 16.

Qualifying criteria	Response	Supporting information provided		
Relevant purpose determination				
1 Has the chief executive of the Vegetation Management Act 1999 determined the proposed clearing is for a relevant purpose?	<ul> <li>Yes: Proceed to question 2.</li> <li>The proposed clearing area the subject of the relevant purpose determination must be the same as the proposed clearing area the subject of the development application.</li> <li>A copy of the following information from the Department of Resources must be provided: <ul> <li>a. the letter confirming the proposed development is for a relevant purpose; and</li> <li>b. the Relevant Purpose Determination Plan (RPDP) showing the area subject to the relevant purpose determination.</li> </ul> </li> </ul>

## **Appendix A – Clearing limitations**

Limitation	Clearing limitation
Number 1	<b>Clearing</b> must not include <b>clearing</b> using a chain or cable linked between two tractors, bulldozers or other traction vehicles.
2	The proposed <b>clearing</b> must be consistent with the: a. <b>regional ecosystem</b> /s (listed in table 4 of SDAP state code 16); b. method/s of <b>clearing</b> (listed in table 4 of SDAP state code 16); and c. restrictions of <b>clearing</b> (listed in table 4 of SDAP state code 16); approved in the relevant purpose determination.
3	<ul> <li>Clearing must not occur in any of the following:</li> <li>a. in thickets; or</li> <li>b. for mechanical clearing, within five metres or less from the trunk of a mature tree, habitat tree or tall immature tree.</li> </ul>
4	<ul> <li>Clearing must retain:</li> <li>a. all mature trees and habitat trees;</li> <li>b. a full range of sizes and species typical of the regional ecosystem in the area; and</li> <li>c. where the number of mature trees plus habitat trees is less than 20 per hectare, tall immature trees to total 20 mature trees, habitat trees and tall immature trees per hectare.</li> </ul>
5	Where <b>clearing immature trees</b> , <b>clearing</b> must retain the number of <b>immature trees</b> specified in table 4 of SDAP state code 16 distributed in a pattern that is as natural as possible.
6	Where <b>clearing low shrubs</b> in <b>regional ecosystems</b> restricted to <b>low shrubs</b> as specified in table 4 of SDAP state code 16, <b>clearing</b> must retain: a. all <b>immature trees</b> ; and b. at least 10 per cent of the predominate species that have thickened.
7	Where <b>clearing low shrubs</b> in <b>regional ecosystems</b> not restricted to <b>low shrubs</b> as specified in table 4 of SDAP state code 16, <b>clearing</b> must retain: a. at least the number of <b>immature trees</b> specified in table 4 of SDAP state code 16; and b. at least 10 per cent of the predominate species that have thickened.
8	Mechanical clearing must not result in debris being stacked or pushed against a mature tree, habitat tree or tall immature tree.
9	Clearing must not be undertaken by: a. aerial application of any herbicide; or b. application of a root-absorbed broad spectrum herbicide.
10	Clearing must not include chemical clearing within five metres of the trunk of a mature tree, habitat tree or tall immature tree.
11	<ul> <li>Mechanical clearing must not occur in any of the following:</li> <li>a. inside the defining bank of a natural wetland; or</li> <li>b. within 20 metres of the defining bank of a natural wetland.</li> </ul>
12	<ul> <li>Mechanical clearing must not occur in any of the following:</li> <li>a. inside the defining bank of any watercourse or drainage feature;</li> <li>b. within 10 metres of the defining bank of a watercourse or drainage feature that is a stream order 1 or 2 watercourse or drainage feature;</li> <li>c. within 15 metres of the defining bank of a watercourse or drainage feature that is a stream order 3 or 4 watercourse or drainage feature; or</li> <li>d. within 20 metres of the defining bank of a watercourse or drainage feature that is a stream order 5 or more watercourse or drainage feature.</li> </ul>
13	<ul> <li>Mechanical clearing must not result in any of the following:</li> <li>a. disturb more than 50 per cent of the ground surface or result in any hectare having less than 50 per cent ground cover;</li> <li>b. occur on slopes in excess of five per cent; or</li> <li>c. occur within 50 metres of an area of soil erosion and instability.</li> </ul>

State Development Assessment Provisions v3.0

FastTrack5 qualifying criteria checklist 6

14	<b>Mechanical clearing</b> must not occur in <b>land zone 1</b> , <b>land zone 2</b> or <b>land zone 3</b> in areas below the five metre Australian Height Datum.	
15	<b>Clearing</b> vegetation under this approval may only be undertaken within 5 years of the approval taking effect.
